OUR IDENTITY

In a charismatic small Portuguese village, in 1978, during a time marked by political upheaval and economic challenges we ventured into the world of ceramics and founded Borrallheira.

The dream was to build something that would last for generations, leaving a legacy of craftsmanship and family bonds.

Our family company is a reflection of our values and age-old cherished traditions.

We're united by our love for craft that is shared every day, even in the small quotidian moments.

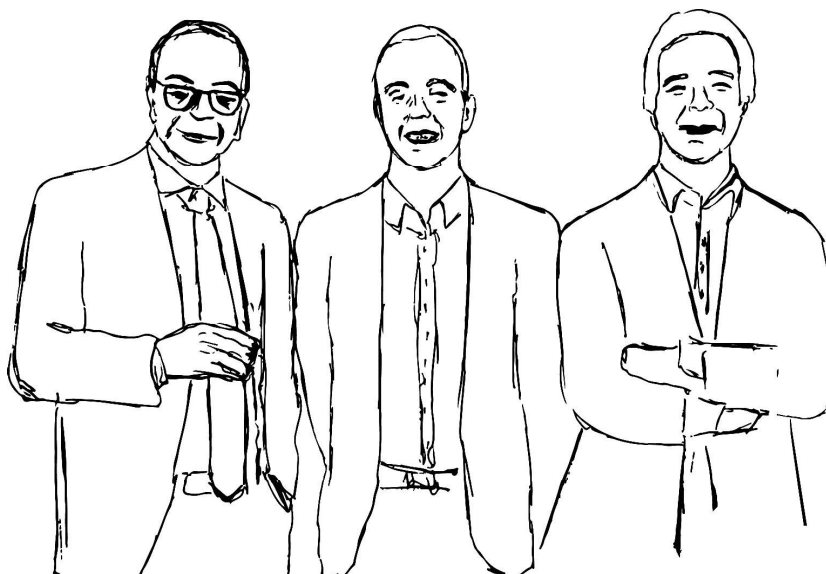

Lunchtime at Borrallheira was since the beginning, not just a time to eat, it was a celebration. Each meal was lovingly crafted to bring joy during moments of sharing ideas and overcome difficulties.

Over time the family company thrived and it became known far and wide for its dedication to quality and tradition.

The founder's sons grew up surrounded by the earthy scent of stoneware and the rhythmic sounds of tools shaping it into works of art.

Together, they gracefully embraced the legacy, absorbing not just the skills of the trade, but also the values that made the company stand apart. Looking towards the future and weaving their own dreams, they brought new ideas and fresh perspectives to the table.

Each piece we create is a testament to the resilience and creativity of the Portuguese spirit.

OUR SPECIALTY

We create and produce stoneware pots, tableware and tiles from our own brands.

With unwavering dedication we merge contemporary designs and innovative technology with craftsmanship methods.

We select the finest natural materials, locally sourced and transformed in our factory and we develop each piece with maximum rigor and quality.

We've 4 clays available: white, terracota, grey and black stone and we take pride in offering a wide range of shapes, colors and textures.

OUR MISSION

We are committed to seamlessly blend tradition with innovation by creating stoneware pieces that embody the essence of craftsmanship, functionality and timeless beauty.

We are faithful to our customers with whom we bet on a long-term relationship working together on the development of styling solutions that suit their needs.

We have a compromise with quality, innovation and fast delivery capacity at competitive prices.

OUR VISION

We envision a future where our commitment to sustainability is woven into every step in our production process.

Our goal is to produce high quality stoneware items with a minimal ecological footprint.

SUSTAINABILITY

We act today, because we think about tomorrow.

While crafting products of enduring beauty and utility, in the heart of every great company lies a promise to Mother Earth.

From the moment raw materials are sourced to the firing of our creations, every process is filled with reverence for the planet.

We implemented transformative processes that stand as a testament to our vision and we're always looking for new measures that allow decarbonization and increase energy efficiency.

In our pursuit of a more harmonious relationship with our planet, we've embarked on an inspiring journey of sustainability.

Picture this: a majestic rainwater capture system dances in harmony with the rhythm of nature, while solar panels stand tall, soaking in the sun's radiant energy to power our endeavors and amidst our production processes, a gentle vacuum system whispers, ensuring that no harmful particles disturb the tranquility.

But our commitment to Mother Earth doesn't end there. We've delved deeper, integrating ingenious heat recovery systems and innovative water treatment processes.

Every droplet utilized in our production is cherished, treated, and lovingly reused, reflecting our dedication to responsible stewardship.

Looking ahead, the horizon brims with promises of further sustainability endeavors. We envision harnessing the warmth from our air compressors, electrifying our firing process, and gracefully transitioning to renewable energy sources for drying.

Together, we're not merely building a future, we're crafting an opulent tapestry of sustainability, weaving threads of hope and vitality.

We invite you to join us as we building a brighter, greener future for generations to come.

USE & CARE

Stoneware items are known for their exceptional durability, highly resistant to breakage and thermal shock.

Each of our stoneware pots is unique, offering a distinct character and style due to variations inherent to the firing process.

These variations can include subtle differences in color, shape, texture and glaze effect. All of this is influenced by factors such as temperature fluctuations and kiln conditions during firing. Embracing these natural variations, we celebrate the organic beauty of each stoneware piece.

Our stoneware pots are produced using a single firing system heated up to 1100°C and they can be used indoors or outdoors.

To ensure the longevity and beauty of our stoneware products, please follow these simple guidelines:

- Handle it with care to avoid breakages or scratchings.
- When cleaning to remove dirt or dust please use a soft wet cloth. If a cleaning liquid is used, make sure it is non-abrasive.
- We do not recommend stacking the vases when storing them.
